Roman God of  
the Sea

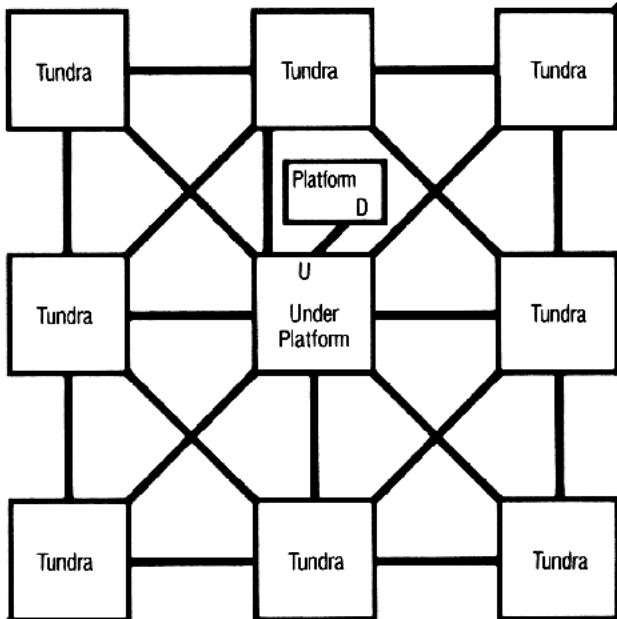

The Eniwetok ATOLL was the site of America's first H-bomb explosion.

In the depths of OUTER SPACE, an orbiting "umbrella" of high technology defends the Free World from nuclear attacks.

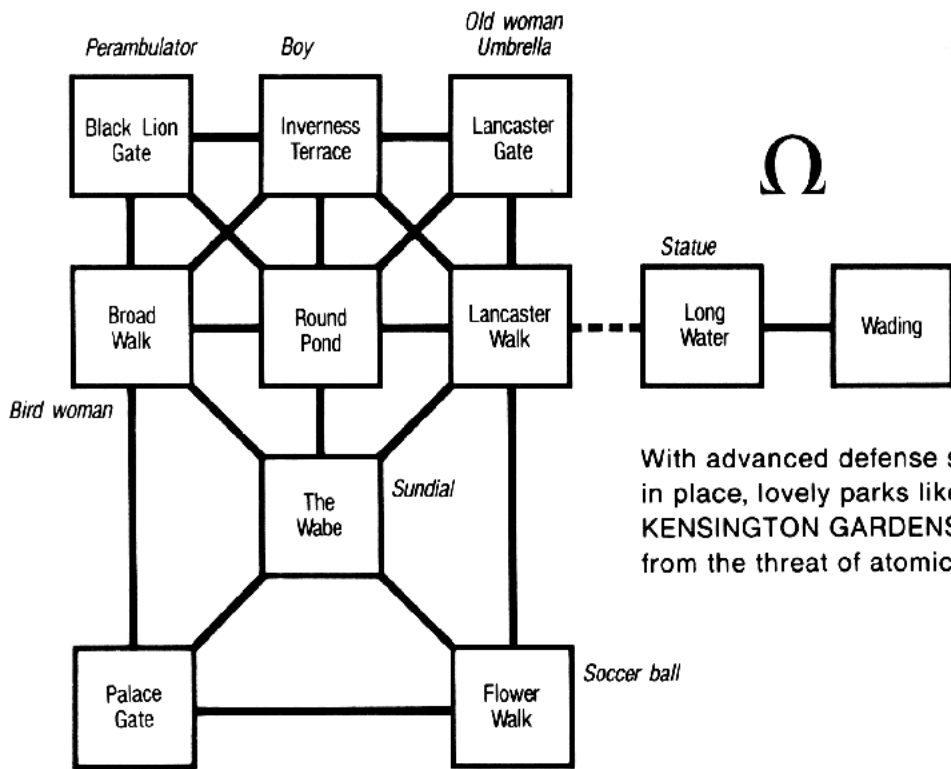

Ω

Cliff  
Edge

Control  
Bunkers

In the wastelands of **SIBERIA**, the Russians build and test their own atomic weapons.

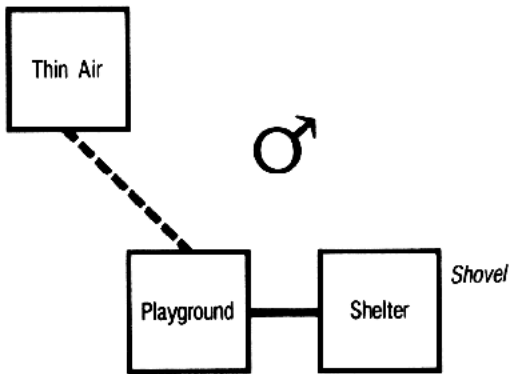

With advanced defense systems now in place, lovely parks like London's KENSINGTON GARDENS are safe from the threat of atomic war.

P

UNDERGROUND testing helps us to develop more and better nuclear weapons.

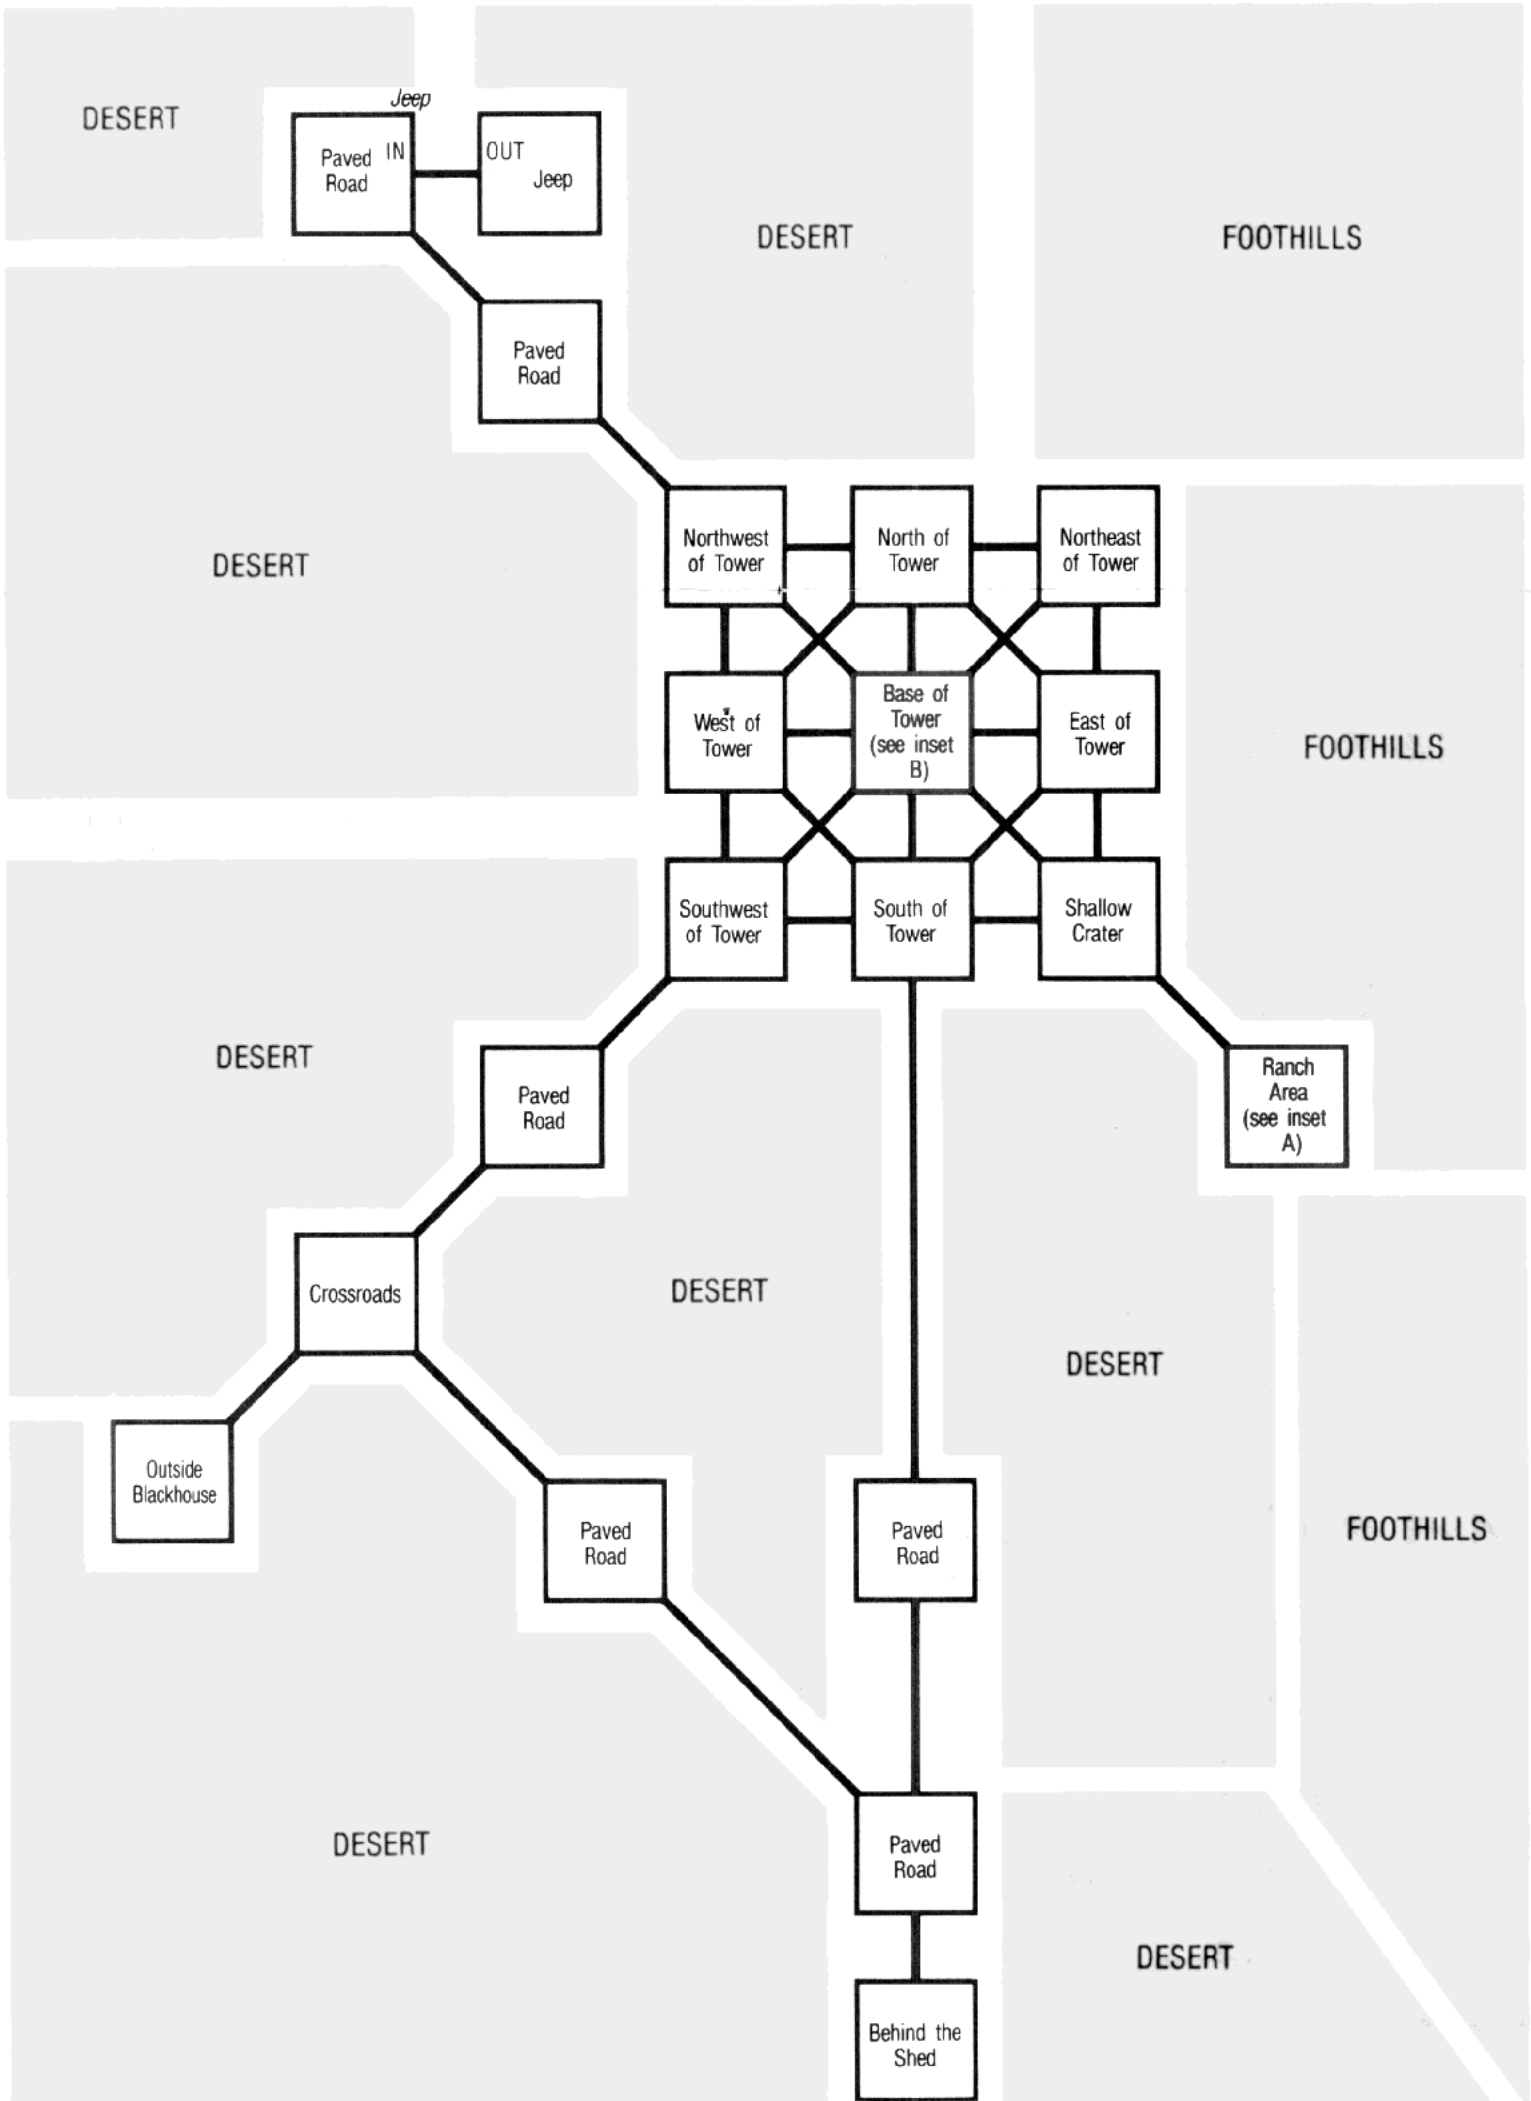

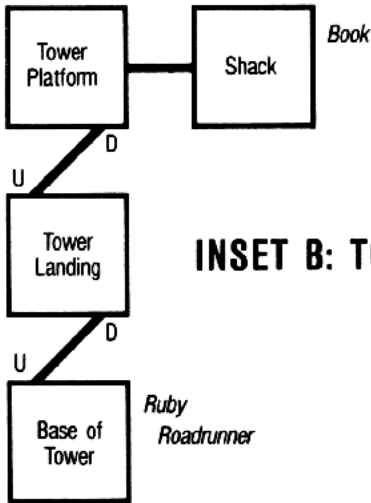

The bombing of the Japanese city of NAGASAKI brought World War II to an end.

The first atomic bomb was built and detonated at this site in the NEW MEXICO desert. A 100-foot steel tower was erected for the test (see map above right). Final assembly of the bomb took place in the nearby ranch house (see map to the left).

## INSET B: TOWER
